**Impianti Elettrici Prefabbricati
SISTEMI BD**

I **Sistemi BD** coprono tutte le esigenze della alimentazione e della distribuzione elettrica in bassa tensione.

Concepiti per l'industria dell'auto, sono ormai adottati in ogni settore d'attività, dalle fonderie alle industrie dolciarie, dalle banche agli ospedali, per la loro affidabilità e per le loro prestazioni.

Danno possibilità potenziali di sicuro interesse: si recuperano e si risistemano secondo l'evoluzione dei cicli delle lavorazioni, permettono di spostare gli utilizzatori o di aggiornare e completare il macchinario senza interferenze o interruzioni, sono sicuri perché conformi alla più aggiornata normativa, non richiedono manutenzione, si installano rapidamente e facilmente.

Il loro impiego si giustifica anche quando non vengono richieste prestazioni di rilievo perché sono economici. Oggi con la versione che prevede barre collettrici in alluminio o sue leghe, polarizzano sempre più la preferenza dei tecnici perché, senza rinunciare a prestazione alcuna, offrono soluzioni di evidente convenienza.
